

Nectifirm ADVANCED

Next generation technology for younger-looking neck

primary benefits

A new generation of age-defying technology, this peptide-packed formula is exclusively designed to target Moderate to Advanced Signs of Aging for the neck and décolletage. Formulated using a proprietary blend of peptides, proteins and pioneering ingredients, Nectifirm® ADVANCED works with the skin's own Microbiome to naturally brighten and even skin tone.

points of difference

A potent blend of 8 distinctive peptides lessens the look of lines and wrinkles by strengthening the dermal-epidermal junction (DEJ) and enhancing the extra-cellular matrix (ECM). Diglycosyl Gallic Acid works with the skin's own Microbiome to enhance natural mechanisms for brighter, more even skin tone. Lingonberry Extract utilizes "Smart Antioxidant Technology" by helping the skin enhance its own antioxidant system. An extract of Red Microalgae soothes and provides a lifting effect. Specialized ingredients slim and firm the neck by addressing adipose tissue.

who benefits

All skin types. For those who have Moderate to Advanced signs of aging or have been using Nectifirm® and want to take their treatment to the next level.

how to use

Dispense 2 pumps into palm of hand. Using upward strokes, gently apply onto décolletage, working your way up the neck to the jawline. Use twice daily.

Nectifirm ADVANCED

Next generation technology for younger-looking neck

F R E Q U E N T L Y A S K E D Q U E S T I O N S

1 Why do I need a neck cream? Can't I use my face moisturizer? The neck ages differently than the skin on your face and requires its own unique, topical anti-aging technology. Aging on the neck is a result of cumulative damage from repeated movements, tech neck, excess fat, less moisture and sun exposure. Facial moisturizers will only provide minimal benefits and anti-aging results to the neck.

2 How soon should I start using a neck cream? The earlier you start treating the skin on your neck, the less damage you will have. Prevention and correction are the key to maintaining a youthful neck. Those with Mild to Moderate signs of aging should start with Nectifirm®. Those with Moderate to Advanced signs of aging or have been using Nectifirm® and want to take their treatment to the next level should use Nectifirm® ADVANCED.

3 How is Nectifirm® ADVANCED different from Nectifirm®? Nectifirm® ADVANCED works on an entirely different level as it brings a new pathway to anti-aging. In addition to enhancing the dermal-epidermal junction (DEJ), Nectifirm® ADVANCED contains Helichrysum Stoechas Extract to enhance the overall condition of the extra-cellular matrix (ECM) which strongly influences the condition and outward appearance of the skin. Nectifirm® ADVANCED also contains Diglycosyl Gallic Acid that works with the skin's Microbiome to enhance natural mechanisms for brighter, more even skin tone. With "Smart Antioxidant Technology", Lingonberry Extract stimulates the skin's own Superoxide Dismutase.

4 Which ingredients provide a smoothing and lifting effect? Hydrolyzed Manihot Esculenta Tuber Extract, an extract of Cassava, and Porphyridium Polysaccharide, an extract of Red Microalgae, help provide a lifting effect.
