

Light that awakens **C**ells in the skin

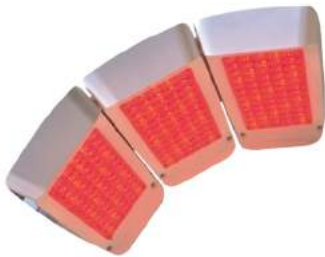

bellalu  LITE
TRIPLE LED SYSTEM

Effect by wavelength

NIR (850nm)

Melanin pigment inhibition / Pigmentation inhibition / Pain relief
Fibroblast proliferation stimulation / Provide anti-aging effect / Skin rejuvenation
Increased cell regeneration / Accelerated wound healing / Promoting blood circulation

RED (625nm)

Scalp Care + Promoting hair growth / Production stimulation of collagen and elastin
Smooth skin texture / Blood circulation and lymphatic fluid increase
Non-melanoma skin cancer (intrinsic PDT with 5-ALA) / Promoting skin elasticity
Mesenchymal wrinkles and superficial hyperpigmentation decreased
Newly appeared pimples (intrinsic PDT with 5-ALA)

AMBER (592nm)

Skin regeneration through collagen activation / Elasticity / Hair loss wound healing
Wound recovery / Pain relief / Muscle and joint pain / Arthritis / Cramp
Temporary increase in blood circulation / Hair re-growth / Pimple care / Skin rejuvenation
Nervous system and lymphatic stimulation / Regeneration of damaged tissue
Reduced skin irritation / Reduction of injection

BLUE (460nm)

Sterilization action / Skin relaxation / Help to remove bacteria in the skin
Prevent skin problems / Excellent cleansing effect Intrinsic / Enlargement pore reduction

Surgery Step

Cleansing

Surgery and Laser

Bellalux

Mask Pack

bellaluX LITE

Features and Benefits

Certified improvement effect by legal clinical trials with verified wavelength and light intensity

Total 13°C Lens are installed, maximizing condensing effect, sufficient light intensity investigation per unit area

bellaluX LITE

Main function

- Light intensity design to penetrate into the dermal layer of skin
- Sufficient light irradiation by installation of HighPower LED [3W]
- Available with three types of simultaneous wavelength investigation
- Economic feasibility of eco friendly materials for LED
- Maintain long term improvement
