

D·E·J Face Cream

Advanced all-in-one age-defying moisturizer

primary benefits

As evaluated by an expert grader, in a twelve-week clinical usage study, D·E·J face cream® was shown to be effective in reducing the signs of aging of the facial skin, including fine lines, wrinkles, clarity/brightness, visual and tactile roughness, evenness of skin tone (redness & hyperpigmentation) and overall appearance with results seen as early as 4 weeks.*

points of difference

An all-in-one facial moisturizer formulated to address all visible signs of aging through pioneering Pathway Technology targeting the Dermal- Epidermal Junction (DEJ) to provide clinically effective results. Contains Alpha-Glucan Oligosaccharide, a Prebiotic, which enhances the skin's defense system, balances and supports helpful organisms to promote a healthy microboime. Palmitoyl Tripeptide-38 lifts the skin and reduces the appearance of fine lines and wrinkles by enhancing the synthesis of Collagen IV, Fibronectin and Laminin-5 at the DEJ. Acetyl Tetrapeptide-2 and the Amino Acid Copper Complex increase synthesis of Elastin and Collagens I and III. Contains THD Ascorbate, which is clinically-proven to brighten and revitalize dull skin. Rosemary Leaf Extract and Ursolic Acid reinforce the barrier function keeping the skin moist and smooth. The overall formula is clinically-proven to reduce the appearance of redness.

who benefits

All skin types, sensitive skin, and particularly those looking to improve the overall visible signs of aging.

how to use

Apply morning and evening after cleansing and after all other treatment products, dispense one to two pumps into the palm of hand and gently smooth onto face avoiding the eye area. Allow product to absorb before applying sunscreen in the morning. If also using D·E·J Night face cream™, use D·E·J face cream® in the morning and D·E·J Night face cream™ in the evening.

D·E·J Face Cream

Advanced all-in-one age-defying moisturizer

F R E Q U E N T L Y A S K E D Q U E S T I O N S

1) What is the DEJ?

The DEJ is the Dermal- Epidermal Junction. It is a specific area of skin where the dermis meets the epidermis. During youth, this junction is very “wavy”. With age, this junction flattens and skin becomes more slackened. It’s a key area for skin cell communication and cohesion. Research has shown that addressing the health of the DEJ greatly affects the outward appearance of the skin.

2) How is D·E·J face cream® different from other face creams?

An all-in-one facial moisturizer that addresses all visible signs of aging through multiple pathways to provide comprehensive, clinically effective results. It is one of the first to specifically address the Dermal-Epidermal Junction (DEJ) that research has found, plays an important role in the aging of skin. It is one of the few skincare products on the market with Prebiotic Technology and includes ingredients that biomimic the skin’s natural moisture barrier.

3) Who should use D·E·J face cream®?

Anyone concerned with reducing the appearance of fine lines and wrinkles, improving moisturization and overall skin health.

4) What are the key ingredients that target the DEJ in this product?

Palmitoyl Tripeptide-38 stimulates multiple DEJ proteins including Collagen IV, Fibronectin and Laminin-5. Acetyl Tetrapeptide-2 helps increase elastin synthesis and promotes correct assembly of elastin fibers.

5) How does this product help the skin’s Microbiome?

Alpha-Glucan Oligosaccharide, a prebiotic, selectively supports the growth of healthy organisms which helps balance the microbiota and support diversity on the skin’s Microbiome to promote overall skin health.

6) Which ingredients provide moisture to the skin?

Multiple ingredients including botanical extracts and antioxidants help moisturize and hydrate skin including Hyaluronic Acid, Sunflower Seed Oil Unsaponifiables, Rosemary and Ursolic Acid.
