

Cooling/Heating

Cooling/Heating

- Cooling and heating system with adjustable temperature from -20°C to 40°C .
- Penetrate skin nutrition products deep into the skin through electroporation principle.

Cooling/Heating Effect

- Skin soothing effect with -20°C (Cooling system)
- Thermal Lifting effect with 40°C (Heating system)
- Promoting vitality and skin elasticity by muscle contraction and relaxation exercises.

Electroporation Principle

- Penetrate ingredients deeply into the skin with short transient electric pressure into the skin.

SONO(Ultrasound)

- Ultrasound permeates ingredients evenly to the fat and muscle layers safely and painlessly.
- Expedite synthesizing collagen and elastin.

Scrubber

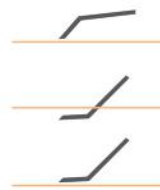

- Ultrasonic vibrations turn substances into smaller molecules to reach deep into the skin.

- It will revitalize, firm and smooth skin's surface.
