

Brightening Facial Wash

Rejuvenating cleanser for brighter, smoother skin

primary benefits

Rejuvenating cleanser contains natural skin brightening Botanical Extracts and exfoliants. Removes the day's make-up and impurities, leaving the skin feeling clean and smooth.

points of difference

Formulated with natural surfactants, Sucrose Laurate, and Cocamidopropyl Betaine derived from coconut, to mildly cleanse the skin without stripping it of its natural moisture content. Glycolic and Salicylic acid, help exfoliate dead surface cells. Vitamin C (Magnesium Ascorbyl Phosphate), Licorice and Lily Extracts help to brighten the skin.

who benefits

Suitable for all skin types except dry or sensitive.

how to use

Wet face with tepid water. Dispense a nickel-sized amount into palm of hand. Lather in hands. Using fingertips, gently massage onto face using circular motions. Avoid eye area. Rinse thoroughly with water. Pat skin dry. Use twice daily.

Brightening Facial Wash

Rejuvenating cleanser for brighter, smoother skin

F R E Q U E N T L Y A S K E D Q U E S T I O N S

1) Which ingredients are used to brighten the skin?

Glycolic Acid and Salicylic Acid help to brighten the skin through surface exfoliation. It also contains Vitamin C (Magnesium Ascorbyl Phosphate), Licorice and Lily Extract to naturally brighten the skin by inhibiting melanin production.

2) Which skin types should use this cleanser?

Brightening Facial Wash can be used by most skin types, including normal, mature, combination and oily skin. However, it does contain Glycolic Acid and Salicylic Acid, which can be irritating to dry or sensitive skin. It should not be used to remove eye make-up.

3) What are the cleansing agents in Brightening Facial Wash?

Cocamidopropyl Betaine, derived from coconut, and Sucrose Laurate are the main cleansing agents, or surfactants, in Brightening Facial Wash. They are both gentle and suitable for most skin types.

4) Why is it important to use a cleanser with exfoliants?

Exfoliation removes dehydrated cells from the surface of the skin, brightening and smoothing it and enabling better penetration of other anti-aging products.

5) Will this cleanser make me sensitive to sunlight?

Yes. Glycolic Acid and Salicylic Acid exfoliate the top layer of skin, making it more sensitive to sunlight. It is important to protect the skin from harmful UVA and UVB rays when using products that contain acids.

6) My skin sometimes feels dry after cleansing. What should I do?

Due to the exfoliating properties of Brightening Facial Wash, your skin may feel dry immediately after cleansing. We recommend following with Soothing Facial Rinse, which rebalances, hydrates and calms the skin.

7) Which other Revision products work well with Brightening Facial Wash?

- Soothing Facial Rinse
- Vitamin C Lotion 15% or 30%
- Retinol Complete® 0.5 or 1.0
- Intellishade® Original, Matte or TruPhysical™
- Multi-Protection Broad-Spectrum SPF 50
